

PM Role in an AI World: the session at a glance

120 minutes, the same in every region. One outcome: an agent every room tries the week after.

1 Introduction

10 min • plenary • moderator

- Why the PM role is changing
- Goal: define your work around AI
- Everyone already knows their room

2 AI use cases

2 x 15 min • plenary • 2 speakers

- Two real AI use cases
- What it took and what it gave back
- Sets the bar for the pilots

3 Breakout • Pain to Pilot

60 min • rooms C1-C6 • group lead + team

Orient 5'	Map the hours 10'	Design 12'
Build & challenge 15'	Fix & decide 8'	Commit 10'

- One case, one agent, one pilot per room
- Agent takes routine, PM keeps judgment
- Output: Pilot Pack + 90-second summary

4 Wrap-up

20 min • plenary • debrief host

- Summit Debrief: 90 s per room
- What each room tries next week
- Feedback coordinators named

BEFORE • BY TUE 3 NOV

- Rooms allocated in the invitation (29 Oct)
- Pre-work: story, case file, own week
- Group lead per room with Agent Builder

SITE OWNERS • ON THE DAY

- A space per room near the plenary
- Laptop, screen, network, tool access
- Case, sample data and Pilot Pack

AFTER THE SUMMIT

- Each room tries its agent the next week
- Feedback coordinators collect results
- 30-day readout in early December
